Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 23 and 24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

3. There is no support in the originally filed specification for the new limitation "within 10 Hz".

4. There is no support in the originally filed specification for the limitation "creating enhanced-streamwise-vortices ... through the interaction between corner vortices and said primary vortices".

5. Claims 23 and 24 rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. While it unclear what is be claimed as discuss below, the original specification fails to enable one skilled in the art to create the claimed condition of "said shear layers having a specific receptivity to said narrow frequency range".

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1723

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. In claim 23, it is unclear whether "within 10 Hz" refers to the frequency of the band or the width/narrowness of the band. Also, if it refers to the frequency, rather than the width, then the scope of the term "narrow" is unclear.

9. It is unclear what is meant by "said shear layers having a specific receptivity to said narrow frequency band" and it is unclear how to determine if this condition is satisfied.

Response to Arguments

10. Applicant fails to point out any support in the specification as original filed for the limitations that are rejected under section 112, first paragraph as being new matter.

11. Applicant states: "[t]o enable one skilled in the art to which the claims pertain, to make and/or use the invention, the inventor has added some introduction and explanation in the sections of the claims [sic] and specification". However, the invention must have been enabled as of the filing date.

12. While the examiner agrees that Cottel et al. (US Re. 25,324) does not disclose the frequency being 10 Hz or less, neither does applicant's originally filed disclosure.

13. Applicant's arguments regarding Cottel et al. (US Re. 25,324) are generally moot because this reference is not longer applied since it does not disclose the frequency being 10 Hz or less.

Art Unit: 1723

Conclusion

14. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than ~~SIX MONTHS from the date of this final action.~~
